# PROJECTS

GPX Parser Website | C, JavaScript, SQL, Node.js, Express, JQuery, HTML/CSS

Jan 2021 – May 2021

- Created a full stack web-application to display information regarding GPX files uploaded by the user, including the ability to download the GPX files itself
- Front-end implemented with HTML/CSS and Bootstrap to display front-end components
- Used JQuery / Ajax to handle API calls to the back-end
- Utilizes MySQL databases with multiple queries to save instances of GPX files uploaded on the website upon user request with front-end elements.

#### Electronic Store Search GUI | Java, Gradle, JUnit

Nov 2020

- Developed a Java program which allows users to add products with various details or search through previously added products, these products were stored as classes
- The GUI implemented used the Swing class
- Gradle was used as a build tool to compile and test all Java files
- JUnit was used together with Gradle to test functions of the program

## University Course Scraper | JavaScript, Python, Playwright, Node.js

 $\mathrm{Jan}\ 2022$ 

- Developed a scraper for University of Guelph course website with team of university students
- Scraped with playwright then parsed in JavaScript to create usable JSON file
- Created CLI with Python to sort through courses from JSON
- Ability to graph selected courses into a pdf with GraphViz

# EXPERIENCE

Cashier

## Quality Intern

May 2021 – Present

Hammond Power Solutions

Guelph, ON

- Worked on Excel Spreadsheets, Visual Basics, and SharePoint Sites using Window Programs
- Created forms using SharePoint programs to get relevant data to create Excel Sheets

# Longo's

 $Oct\ 2018-Nov\ 2019$
